Pain Management Tips

- Keeping a pain diary can help you understand your pain, identify any triggers and keep track of what eases your pain.
- Keep active to help maintain your strength and flexibility. Physical movement can help to relieve pain.
- Avoid over doing things and practice pacing.
- Relaxation techniques such as breathing exercises, mindfulness and meditation have been shown to relieve pain.
- Distracting yourself with another activity such as reading or doing something creative has been shown to relieve pain.
- Understand your medications and how they can help.
- Stop smoking and reduce alcohol consumption.
