## > What is it?

Stress is the emotional and physical response we have when we feel overwhelmed and unable to cope with the demands life places on us. When we are stressed we can find it difficult to sleep, have difficulty concentrating, feel irritable, have headaches or other aches and pains and experience problems with appetite and digestion. We are all likely to feel stressed at some point in our lives and a little bit of stress can sometimes be a good thing as it can help to

## Stress busting tips

- Eat a well balanced diet –
   our brains need vitamins,
   minerals and energy to help
   us feel at our best.
- Keep physically active –
   evidence shows that
   exercise can boost our self esteem and improve our
   emotional wellbeing.
- Avoid alcohol, caffeine and nicotine – alcohol is classed as a 'strong depressant' and can lower your mood and excess caffeine and nicotine can contribute to the feelings of anxiety we experience when stressed.
- Relax
   – make sure your find time to do activities that help you relax such as listening to music or having a warm bath. Evidence suggests that techniques such as mindfulness and meditation can help to improve our emotional wellbeing.
- causing you to feel stress, remember that you don't have to cope with it alone. Connect with people who can offer you support. That could be friends and family, work colleagues, your HR department or union representative, local peer support groups local organisations like Bromley Well or your GP.
